

Questions:

- * How should we lay out the tables?
- * What else are we missing that's being brought?

Notes:

- * The plot isn't square as depicted. We should have extra space in the lower-right corner. Also, we border two tree lines, technically, so we have lots of leeway.
- * Usually, muddy conditions can affect routes to the camp but not the camp itself. Still, you never know...
- * I believe we need only 5 tent zones, but I've allocated for 6.
- * One of the 10'x10' shade structures has walls, so it can be the upper-right corner and block the storage area somewhat.
- * The bar will be in one of the further back shade structures.
